- German - A1

Profile

Highly motivated software developer with a background in programming and a passion for cutting-edge technology. Looking to apply and expand my skills in a professional environment by contributing to innovative projects, continuously learning and developing. Aspire to stay up-to-date with industry trends through hands-on experience and self-study.

Professional Experience

Company: Elladium Holding

08/2024 - Present

Gained practical, graduation-level experience building and supporting scalable backend systems. Focused on API integration, asynchronous processes, and real-time data handling.

Core Technical Experience:

- Developed robust RESTful and GraphQL APIs using Python (e.g., FastAPI, Django REST Framework); managed data across both SQL and NoSQL databases.
- Implemented asynchronous and real-time features, utilizing WebSockets for dynamic updates and Celery/ Redis for efficient background task processing and caching.
- Applied foundational knowledge of cloud environments, containerization (Docker/ Docker Compose), web application security, and webhook communication patterns.

PROFESSIONAL EDUCATION

Thomas More University of Applied Science

09/2024-06/2027

Geel, Belgium

Educational program: Bachelor's degree, Applied Computer Science

Main subjects: Python programming, Web design with HTML and CSS, Full stack applications.
